

Product Datasheet

Opsin 3 antibody [N1], N-term GRP122

Description	Opsins are members of the guanine nucleotide-binding protein (G protein)-coupled receptor superfamily. In addition to the visual opsins, mammals possess several photoreceptive non-visual opsins that are expressed in extraocular tissues. This gene, opsin 3, is strongly expressed in brain and testis and weakly expressed in liver, placenta, heart, lung, skeletal muscle, kidney, and pancreas. The gene may also be expressed in the retina. The protein has the canonical features of a photoreceptive opsin protein. [provided by RefSeq]	
Species/Host	Rabbit	
Reactivity	Human, Mouse	
Conjugation	Unconjugated	
Tested Applications	IHC-Fr, IHC-P, WB	
Immunogen	Carrier-protein conjugated synthetic peptide encompassing a sequence within the N-terminus region of human Opsin 3. The exact sequence is proprietary.	Immunohistochemical analysis of paraffin-embedded human breast cancer, using Opsin 3(GRP574) antibody at
Form/Appearance	Liquid: 1XPBS, 20% Glycerol (pH7). 0.025% ProClin 300 was added as a preservative.	1:250 dilution.
Concentration	1.51 mg/ml	10 M
Storage	Store as concentrated solution. Centrifuge briefly prior to openin- vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.	une en- ti=- t=- t=- t=- t=- k=- k=-
Note	For research use only.	Whole cell extract (30 ?g)
Isotype	lgG	was separated by 10% SDS-PAGE, and the membrane was
Clonality	Polyclonal	blotted with Opsin 3 antibody [N1],
Purity	Purified by antigen-affinity chromatography.	N-term (GRP574) diluted at
Uniprot ID	Q9H1Y3	1:1000. The HRP-conjugated anti-rabbit IgG antibody
Entrez	23596	was used to detect the primary
Dilution Range	WB: 1:500-1:3000,IHC-P: 1:100-1:1000,IHC-Fr: 1:100-1:1000	antibody.
