

Product Datasheet

Rabbit anti-Candida albicans, species, Recombinant Monoclonal Antibody, Unconjugated GRP1245

Species/Host	Rabbit
Conjugation	Unconjugated
Tested Applications	ELISA, IF, IHC

Form/Appearance 0.01 M phosphate buffered saline, pH 7.2

Concentration 100 ug/1 ml

Preservatives 0.1% sodium azide

Storage 2-8°C

Note For research use only.

Isotype IgG1

Clonality Monoclonal

Purity >90%

Application Notes pairs in ELISA with itself, and with rabbit poly 6411. Extraction of specimen with 0.4M NaOH required for optimum sensitivity. These purified preparations consist of >90% pure rabbit monoclonal antibody which has been purified from culture medium by protein A chromatography or sequential differential precipitations. The final preparation is formulated to a protein concentration of 100 µg/ml in 0.01 M phosphate buffered saline, pH 7.2 and contains 0.1% sodium azide. Each vial contains 1.0 ml. This product contains no stabilizing proteins and should be stored at 2-8°C until ready for use. Working dilution must be determined by the user. Suggested starting ranges are 1:10-1:50 for IFA and 1:20-1:200 for ELISA.
