## **Product Datasheet**

## ATP6V1A antibody GRP129

**Description** This gene encodes a component of vacuolar ATPase (V-ATPase), a

multisubunit enzyme that mediates acidification of eukaryotic intracellular organelles. V-ATPase dependent organelle acidification is necessary for such intracellular processes as protein sorting, zymogen activation, receptor-mediated endocytosis, and synaptic vesicle proton gradient generation. V-ATPase is composed of a cytosolic V1 domain and a

transmembrane V0 domain. The V1 domain consists of three A and three B subunits, two G subunits plus the C, D, E, F, and H subunits. The V1 domain contains the ATP catalytic site. The V0 domain consists of five different subunits: a, c, c', c", and d. Additional isoforms of many of the V1 and V0 subunit proteins are encoded by multiple genes or alternatively spliced transcript variants. This encoded protein is one of two V1 domain A subunit isoforms and is found in all tissues. Transcript variants derived from alternative polyadenylation exist. [provided by RefSeq]

Species/Host Rabbit

Reactivity Human, Mouse

**Conjugation** Unconjugated

Tested Applications ICC, IF, IHC-P, IP, WB

Immunogen Recombinant protein encompassing a sequence within the cente

region of human ATP6V1A. The exact sequence is proprietary.

Form/Appearance Liquid: 1XPBS, 20% Glycerol (pH7). 0.025% ProClin 300 was

added as a preservative.

Concentration 0.57 mg/ml

**Storage** Store as concentrated solution. Centrifuge briefly prior to opening

vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid

multiple freeze-thaw cycles.

**Note** For research use only.

**Isotype** IgG

**Clonality** Polyclonal

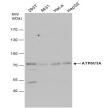

**Purity** Purified by antigen-affinity chromatography.

Uniprot ID P38606

Entrez 523

Dilution Range WB: 1:1000-1:10000,ICC: 1:100-1:1000,IHC-P: 1:100-1:1000,IP:
