

## Product Datasheet

### Anti-Transferrin Purified Azide Free GRP10362

|                            |  |
|----------------------------|--|
| <b>Description</b>         | The antibody HTF-14 recognizes an epitope located in the N-terminal domain of human serum transferrin, a 77 kDa single polypeptide chain glycoprotein (member of the iron binding family of proteins). It is synthesised in the liver and consists of two domains each having a high affinity reversible binding site for Fe <sup>3+</sup> . |
| <b>Reactivity</b>          | Human, Pig, Rabbit   |
| <b>Tested Applications</b> | ELISA, FA, ICC, IHC-P, RIA, WB   |
| <b>Immunogen</b>           | Purified porcine transferrin.  |
| <b>Concentration</b>       | 1 mg/ml  |
| <b>Storage</b>             | Store at 2-8°C. Do not freeze. Do not use after expiration date stamped on the label.  |
| <b>Note</b>                | For research use only.   |
| <b>Isotype</b>             | Mouse IgG1   |
| <b>Clonality</b>           | Monoclonal   |
| <b>Clone ID</b>            | HTF-14   |
| <b>Uniprot ID</b>          | P02787   |
| <b>NCBI</b>                | 7018   |
