### Anti-TNF alpha Purified GRP10369

|                            |                                                                                                                  |
|----------------------------|------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>         | The mouse monoclonal antibody MAb11 recognizes human 17-26 kDa cytokine TNF-alpha (tumor necrosis factor alpha). |
| <b>Reactivity</b>          | Human, Pig, Primate                                                                                              |
| <b>Tested Applications</b> | ELISA, FC, ICC, IHC-Fr                                                                                           |
| <b>Immunogen</b>           | Recombinant human TNF-alpha                                                                                      |
| <b>Concentration</b>       | 1 mg/ml                                                                                                          |
| <b>Storage</b>             | Store at 2-8°C. Do not freeze. Do not use after expiration date stamped on the label.                            |
| <b>Note</b>                | For research use only.                                                                                           |
| <b>Isotype</b>             | Mouse IgG1 kappa                                                                                                 |
| <b>Clonality</b>           | Monoclonal                                                                                                       |
| <b>Clone ID</b>            | MAb11                                                                                                            |
| <b>Uniprot ID</b>          | P01375                                                                                                           |
| <b>NCBI</b>                | 7124                                                                                                             |
