

Product Datasheet

Anti-Hu STRO-1 PE GRP10411

Description	The mouse monoclonal antibody STRO-1 recognizes an extracellular epitope of the cell surface antigen STRO-1 expressed by bone marrow mesenchymal stromal cells and nucleated erythroid precursors, but not by committed hematopoietic progenitors.
Reactivity	Human, Rat, Rabbit
Tested Applications	FC
Immunogen	Human CD34 positive bone marrow cells
Concentration	0.1 mg/ml
Storage	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not use after expiration date stamped on vial label.
Note	For research use only.
Isotype	Mouse IgM lambda
Clonality	Monoclonal
Clone ID	STRO-1
