

## Product Datasheet

### Anti-SIT Purified GRP10420

|                            |   |
|----------------------------|---|
| <b>Description</b>         | The antibody SIT-01 reacts with an intracellular epitope of SHP2-interacting transmembrane adaptor protein (SIT) expressed exclusively in lymphoid organs. It weakly crossreacts with murine SIT. |
| <b>Reactivity</b>          | Human   |
| <b>Tested Applications</b> | FC, IP, WB  |
| <b>Immunogen</b>           | Bacterially produced recombinant intracellular fragment of human SIT.   |
| <b>Concentration</b>       | 1 mg/ml   |
| <b>Storage</b>             | Store at 2-8°C. Do not freeze. Do not use after expiration date stamped on the label.   |
| <b>Note</b>                | For research use only.  |
| <b>Isotype</b>             | Mouse IgG1  |
| <b>Clonality</b>           | Monoclonal  |
| <b>Clone ID</b>            | SIT-01  |
| <b>Uniprot ID</b>          | Q9Y3P8  |
| <b>NCBI</b>                | 27240   |
