## **Anti-Kinesin Heavy Chain Purified GRP10525**

**Description** The antibody KN-03 recognizes heavy chain of conventional

kinesin, a protein associated with intracellular vesicles, and with lower affinity with denaturated molecule. It stains Western blots of kinesin-enriched preparations. Epitope mapping (by limited proteolysis of partially purified porcine kinesin) followed by immunoblotting has revealed that antibodies KN-01, KN-02 and KN-03 react with different sets of fragments The antibody KN-03 well recognizes kinesin bound to taxol-stabilized microtubules.
