Product Datasheet

Anti-HLA-E Purified GRP10619

Description The antibody MEM-E/06 recognizes an extracellular epitope on

native surface-expressed HLA-E, but not denaturated heavy chain of HLA-E. HLA-E belongs to the MHC Class I molecules (MHC Class Ib; nonclassical) and it is expressed on many types of the human cells. The published results showed that the antibody cross-reacts with some classical MHC Class I molecules (HLA-A3, -A11, -B7). However, the recent Workshop I Session on the 3rd International Conference on HLA-G (Paris, July 2003) confirmed that the antibody exhibits much broader cross-reactivity classical MHC Class I antigens, namely with HLA-A24, -A32, -B8, -B15, -B27,

-B35, -B44, -B54, -C3, -C4, -C5, -C7.

Reactivity Human, Primate

Tested Applications FC, IHC-P, IP

Immunogen Bacterially expressed recombinant HLA-E refolded with

beta2-microglobulin and peptide.

Concentration 1 mg/ml

Storage Store at 2-8°C. Do not freeze. Do not use after expiration date

stamped on the label.

Note For research use only.

Isotype Mouse IgG1

Clonality Monoclonal

Clone ID MEM-E/06

Uniprot ID P13747

NCBI 3133
