

## Product Datasheet

### Anti-HLA Class I FITC GRP10661

<b>Description</b>	The antibody W6/32 recognises an extracellular epitope of MHC Class I molecules (MHC Class Ia) that are expressed on the surface of all human nucleated cell types. The antibody W6/32 is a valuable reagent for analysing variations in HLA class I expression in different disease states e.g. liver disease, muscular dystrophy, inflammatory myopathy and other neuromuscular disorders. This antibody W6/32 is also suitable as a positive control for HLA tissue typing and crossmatching.
<b>Reactivity</b>	Human, Bovine, Primate, Cat
<b>Tested Applications</b>	FC
<b>Immunogen</b>	Membrane of human tonsil cells
<b>Concentration</b>	1 mg/ml
<b>Storage</b>	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not use after expiration date stamped on vial label.
<b>Note</b>	For research use only.
<b>Isotype</b>	Mouse IgG2a
<b>Clonality</b>	Monoclonal
<b>Clone ID</b>	W6/32
