

## **Product Datasheet**

## Anti-HLA Class I FITC GRP10661

| Description         | The antibody W6/32 recognises an extracellular epitope of MHC<br>Class I molecules (MHC Class Ia) that are expressed on the<br>surface of all human nucleated cell types. The antibody W6/32 is<br>a valuable reagent for analysing variations in HLA class I<br>expression in different disease states e.g. liver disease, muscular<br>dystrophy, inflammatory myopathy and other neuromuscular<br>disorders. This antibody W6/32 is also suitable as a positive<br>control for HLA tissue typing and crossmatching. |
|---------------------|---|
| Reactivity          | Human, Bovine, Primate, Cat   |
| Tested Applications | FC  |
| Immunogen           | Membrane of human tonsil cells  |
| Concentration       | 1 mg/ml   |
| Storage             | Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not use after expiration date stamped on vial label.   |
| Note                | For research use only.  |
| Isotype             | Mouse IgG2a   |
| Clonality           | Monoclonal  |
| Clone ID            | W6/32   |
