Product Datasheet

Anti-Rt CD8b PE
GRP10817

Description	The mouse monoclonal antibody 341 (also known as 34.1) recognizes rat CD8b, the 32-34 kDa beta chain of the CD8 coreceptor (extracellular epitope), expressed on T cell subsets and some other cell types, such as macrophages.
Reactivity	Rat
Tested Applications	FC
Immunogen	CD8 positive Wistar rat splenic T cell hybridomas
Concentration	0.5 mg/ml
Storage	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not use after expiration date stamped on vial label.
Note	For research use only.
Isotype	Mouse IgG1 kappa
Clonality	Monoclonal
Clone ID	341
Uniprot ID	P10966
NCBI	926
