

Product Datasheet

Anti-Ms CD8b PE GRP10818

Description	The rat monoclonal antibody H35-17.2 recognizes an extracellular epitope of mouse CD8b, the 32-34 kDa beta chain of the CD8 coreceptor, expressed on cytotoxic T cells and thymocytes.
Reactivity	Mouse
Tested Applications	FC
Immunogen	Mouse CD8b
Concentration	0.5 mg/ml
Storage	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not use after expiration date stamped on vial label.
Note	For research use only.
Isotype	Rat IgG2b kappa
Clonality	Monoclonal
Clone ID	H35-17.2
