

Product Datasheet

Anti-Ms CD49d PE GRP11045

Description	The rat monoclonal antibody R1-2 recognizes an extracellular epitope of murine CD49d / Integrin alpha 4 (VLA-4 alpha), an approximately 150 kDa glycoprotein of the integrin family, expressed on multiple blood cell types.
Reactivity	Mouse
Tested Applications	FC
Immunogen	murine T lymphoma line TK1
Concentration	0.5 mg/ml
Storage	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not use after expiration date stamped on vial label.
Note	For research use only.
Isotype	Rat IgG2b kappa
Clonality	Monoclonal
Clone ID	R1-2
Uniprot ID	Q00651
NCBI	16401
