

## Product Datasheet

### Anti-Bov CD45R Purified GRP11081

<b>Description</b>	The antibody IVA103 reacts with an extracellular epitope of CD45R antigen (bovine), a single chain type I transmembrane glycoprotein (member of the protein tyrosine phosphatase family), a restricted form of the CD45 family. CD45R is an essential regulator of T and B lymphocytes antigen receptor signaling and it is specifically expressed in hematopoietic cells.
<b>Reactivity</b>	Bovine
<b>Tested Applications</b>	FC, ICC, IP
<b>Immunogen</b>	Bovine leukocytes.
<b>Concentration</b>	1 mg/ml
<b>Storage</b>	Store at 2-8°C. Do not freeze. Do not use after expiration date stamped on the label.
<b>Note</b>	For research use only.
<b>Isotype</b>	Mouse IgG1
<b>Clonality</b>	Monoclonal
<b>Clone ID</b>	IVA103
