

## Product Datasheet

### Anti-Hu CD361 Biotin GRP11182

<b>Description</b>	The mouse monoclonal antibody MEM-216 recognizes an extracellular epitope of CD361 / EVI2B, almost uncharacterized type I transmembrane protein with broad leukocyte expression, mostly in myeloid and B cells.
<b>Reactivity</b>	Human
<b>Tested Applications</b>	FC, IP
<b>Immunogen</b>	Raji cells
<b>Concentration</b>	1 mg/ml
<b>Storage</b>	Store at 2-8°C. Do not freeze. Do not use after expiration date stamped on the label.
<b>Note</b>	For research use only.
<b>Isotype</b>	Mouse IgG1 kappa
<b>Clonality</b>	Monoclonal
<b>Clone ID</b>	MEM-216
<b>Uniprot ID</b>	P34910
<b>NCBI</b>	2124
