### Anti-Hu CD314 Purified Azide Free GRP11244

|                            |                                                                                                                                                                                                        |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>         | The mouse monoclonal antibody 1D11 recognizes an extracellular epitope of CD314 / NKG2D, a 42 kDa C-type lectin-like activating receptor expressed by NK cells, gamma/delta T cells, and CD8+ T cells. |
| <b>Reactivity</b>          | Human                                                                                                                                                                                                  |
| <b>Tested Applications</b> | FC, FA, IHC-Fr, IP                                                                                                                                                                                     |
| <b>Immunogen</b>           | NKL cell line                                                                                                                                                                                          |
| <b>Concentration</b>       | 1 mg/ml                                                                                                                                                                                                |
| <b>Storage</b>             | Store at 2-8°C. Do not freeze. Do not use after expiration date stamped on the label.                                                                                                                  |
| <b>Note</b>                | For research use only.                                                                                                                                                                                 |
| <b>Isotype</b>             | Mouse IgG1 kappa                                                                                                                                                                                       |
| <b>Clonality</b>           | Monoclonal                                                                                                                                                                                             |
