## **Product Datasheet**

## Anti-CD3 epsilon (activation epitope) PE GRP11280

**Description** The mouse monoclonal antibody APA1/1 recognizes an

activation-dependent intracellular epitope of CD3 epsilon. Exposure of the epitope precedes CD3 phosphorylation and recruitment and activation of ZAP70, which initiates the signaling cascade produced by T-cell activation. APA1/1 provides the earliest known marker for TCR-mediated T cell activation.

Reactivity Human, Mouse

**Tested Applications** FC

**Immunogen** Purified human CD3 proteins isolated from thymus

Concentration 0.1 mg/ml

**Storage** Store in the dark at 2-8°C. Do not freeze. Avoid prolonged

exposure to light. Do not use after expiration date stamped on

vial label.

**Note** For research use only.

**Isotype** Mouse IgG1

**Clonality** Monoclonal

Clone ID APA1/1

Uniprot ID P07766

**NCBI** 916
