Product Datasheet

Anti-CD3 epsilon (activation epitope) PE GRP11280

Description The mouse monoclonal antibody APA1/1 recognizes an

activation-dependent intracellular epitope of CD3 epsilon. Exposure of the epitope precedes CD3 phosphorylation and recruitment and activation of ZAP70, which initiates the signaling cascade produced by T-cell activation. APA1/1 provides the earliest known marker for TCR-mediated T cell activation.

Reactivity Human, Mouse

Tested Applications FC

Immunogen Purified human CD3 proteins isolated from thymus

Concentration 0.1 mg/ml

Storage Store in the dark at 2-8°C. Do not freeze. Avoid prolonged

exposure to light. Do not use after expiration date stamped on

vial label.

Note For research use only.

Isotype Mouse IgG1

Clonality Monoclonal

Clone ID APA1/1

Uniprot ID P07766

NCBI 916
