

Product Datasheet

Anti-Hu CD253 PE GRP11387

Description	The antibody 2E5 reacts with an extracellular epitope within C-terminal half of TRAIL (APO-2L), a 21 kDa cytotoxic protein, activator of rapid apoptosis in tumor cells. TRAIL is mainly expressed in spleen, lung, prostate and also in many other tissues.
Reactivity	Human
Tested Applications	FC
Immunogen	Recombinant soluble fragment (aa 95-281) of human TRAIL.
Concentration	0.1 mg/ml
Storage	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not use after expiration date stamped on vial label.
Note	For research use only.
Isotype	Mouse IgG1
Clonality	Monoclonal
Clone ID	200000
Uniprot ID	P50591
NCBI	8743
