Product Datasheet

Anti-alpha-Fetoprotein Purified GRP11875

Description The mouse monoclonal antibody AFP-11 reacts with human

alpha-Fetoprotein (AFP), a 70 kĎa oncofetal antigen. AFP is a major fetal plasma protein, but is not present in healthy adult tissues. Elevated AFP concentrations in adult plasma may be an early marker of hepatocellular carcinoma or teratoblastoma, while

high concentrations in amniotic fluid may indicate severe

congenital defects of a fetus.

Reactivity Human

Tested Applications ELISA, IHC-P, RIA

Immunogen purified alpha-Fetoprotein

Concentration 1 mg/ml

Storage Store at 2-8°C. Do not freeze. Do not use after expiration date

stamped on the label.

Note For research use only.

Isotype Mouse IgG1

Clonality Monoclonal

Clone ID AFP-11

Uniprot ID P02771

NCBI 174
