## **Product Datasheet**

## SCGB2A2 - Mammaglobin-A GRP12181

Species/Host Rabbit

Reactivity Human

Predicted Reactivity Human

Tested Applications IHC-P, WB, IHC

Immunogen KLH-conjugated 16 amino acids-long synthetic peptide derived

from C-terminal sequence of human mammaglobin Q13296

Form/Appearance Lyophilized in PBS pH 7.4

Storage Store lyophilized/reconstituted at -20°C; once reconstituted make

aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from lyophilized material adhering to the cap or

sides of the tubes.

**Note** For research use only.

**Clonality** Polyclonal

**Purity** Affinity purified serum

**MW** 10.5 / 15 kDa

Uniprot ID Q13296

Dilution Range 1  $\mu$ g/ml (IHC-P), 1  $\mu$ g/ml (WB)

**Application Notes** Additional Information: No cross-reactivity to lipophilin A, lipophilin B (BU101),

lipophilin C (lacryglobin, mammaglobin B), or uteroglobin (Clara cell protein, Clara cell 10 kDa protein) by Western blot analysis of bacterially produced recombinant proteins. Western blot analysis of human breast cancer cells MDA-MB-415 reveals only the mammaglobin band of approximately 15 kDa. Analysis of other cells and tissues might, however, upon prolonged exposure, reveal additional bands at higher molecular weight. Background: Mammaglobin is a 93 amino acids pentide belonging to the secretoglobin superfamily.

is a 93 amino acids peptide belonging to the secretoglobin superfamily. Mammaglobin is expressed by normal breast and skin tissues and is over-expressed in many human breast cancer tumours. In breast tissue, mammaglobin is expressed as a secreted heterodimer together with the other secretoglobin member lipophilin B. Protein synonymes: Mammaglobin-1,

Secretoglobin family 2A member 2 Reconstitution: For reconstitution add 238 µl

of sterile water.
