## HSP90 - Heat shock protein 90 **GRP12194**

Species/Host	Rabbit	
Reactivity	Human, Salmon	HSP90 →
Predicted Reactivity	Fishes, Hen, Mammals	
Tested Applications	WB	
Immunogen	KLH-conjugated synthetic peptide chosen from a highly conserved region of hsp90 found in both the alpha P07900 and beta P08238 form of the protein. The target peptide is perfectly conserved in animals.	
Form/Appearance	Lyophilized	
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tubes.	
Note	For research use only.	
Clonality	Polyclonal	
Purity	Serum	
MW	84-86 kDa	
Uniprot ID	P07900, P08238	
Dilution Range	1:5000 (WB)	
Application Notes	Additional Information: in salmonid fish a cross-reactive band at approxin 40 kDa is observed; antibody will also detect a human recombinant HSP9 proteinAntibody is reacting strongly with recombinant HSP90 from HELA Background: HSP90 is a ubiquitous chaperone involved in numerous cellu processes. Members of this family of proteins play important roles in allo selected group of intracellular signaling molecules reach and maintain functionally active conformations.Alternative names: for hsp90 alpha: HS renal carcinoma antigen NY-REN-38, for hsp90 beta: hsp84 Reconstitution reconstitution add 100 ul of ctorilo water	90 cells. ular wing a SP 86,

reconstitution add 100 µl of sterile water
