Product Datasheet

HSP70/HSC70 - Heat shock protein 70/Heat shock cognate protein 70, Affinity purified GRP12200

Species/Host Rabbit

Reactivity Fungi, Fish, Mammal

Predicted Reactivity Bovine, Danio rerio (Zebrafish), Drosophila melanogaster, Hen,

Mouse, Rat

Tested Applications IP, WB

Immunogen KLH-conjugated synthetic peptide conserved across all known

sequences of HSP70 P08107 and HSC70 proteins P11142

Form/Appearance Lyophilized in PBS pH 7.4

Storage Store lyophilized/reconstituted at -20°C; once reconstituted make

aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from lyophilized material adhering to the cap or

sides of the tubes.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified serum

MW 70 kDa

Uniprot ID P08107 , P11142

Dilution Range 1 : 1000 (IP), 1 : 1000-1: 5000 (WB)

Application Notes Additional Information: This antibody is not suitable for work with samples from

higher plants For detection of plant and algal cytoplasmic hsp70 we recommend following product: AS08 371 Background: Heat shock protein 70 (Hsp70) is the major stress-inducible protein in vertebrates and is highly conserved throughout evolution. It plays a role as a molecular chaperone and is important for allowing cells to cope with acute stress or insult, especially those affecting the protein machinery. Heat shock cognate protein 70 (HSC70) is a highly conserved protein and a member of the family of molecular chaperones. Alternative names:

HSP70.1, HSP70-1/HSP70-2, Heat shock 70 kDa protein 8 Reconstitution: For reconstitution add 50 μ l of sterile water
