

Product Datasheet

GnRHa - gonadotropin-releasing hormone agonist (200 µl) GRP12201

Species/Host	Rabbit
Tested Applications	ELISA
Immunogen	GnRHa (des-Gly10, D-Ala6, Pro9-NH ₂)-LHRH pGlu-His-Trp-Ser-Tyr-D-Ala-Leu-Arg Pro-NH ₂ C56H78N16O12, FW 1167
Form/Appearance	Lyophilized
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tubes.
Note	For research use only.
Clonality	Polyclonal
Purity	Serum
Dilution Range	1: : 80 000 (ELISA)
Application Notes	Additional Information: In ELISA immunoassay anti-GnRHa antibody and sample/standard are added simultaneously within GnRHa coated wells. After incubation, anti-GnRHa antibody bound to the coated GnRHa is detected with HRP-labelled secondary antibodies and color development achieved by addition of TMB reagent. Background: Gonadotropin-releasing hormone (GnRH) is considered to stimulate LH secretion from the pituitary. This antibody is raised against an GnRH analog (GnRHa). Reconstitution: For reconstitution add 200 µl of sterile water.
