

Product Datasheet

hScrib - Protein LAP4 GRP12210

Species/Host	Rabbit
Reactivity	Human
Predicted Reactivity	Human
Tested Applications	WB
Immunogen	GST tagged C-terminus of hScrib Q14160 including PDZ3 and 4 domains
Form/Appearance	Lyophilized
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tubes.
Note	For research use only.
Clonality	Polyclonal
Purity	Serum
MW	175 kDa
Uniprot ID	Q14160
Dilution Range	1 : 5 000 (WB)
Application Notes	<p>Additional Information: Reactivity showed on dilluted human cell culture extracts. Background: Scribble human homologue, hScrib, is a substrate of ubiquitin-mediated degradation by human papillomavirus E6 and the E6AP ubiquitin-protein ligase. hScrib is localised to the basolateral regions of the epithelial cell line MDCK. The mammalian homolog of Scribble has a primary structure and subcellular localization similar to that of its fly homolog, but its function remains unknown. hScrib can have a potential role in the suppression of mammalian tumorigenesis. Alternative name: Protein LAP4</p> <p>Reconstitution: For reconstitution add 100 µl of sterile water</p>
