Product Datasheet

hScrib - Protein LAP4 GRP12210

Species/Host Rabbit

Reactivity Human

Predicted Reactivity Human

Tested Applications WB

Immunogen GST tagged C-terminus of hScrib Q14160 including PDZ3 and 4

domains

Form/Appearance Lyophilized

Storage Store lyophilized/reconstituted at -20°C; once reconstituted make

aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from lyophilized material adhering to the cap or

sides of the tubes.

Note For research use only.

Clonality Polyclonal

Purity Serum

MW 175 kDa

Uniprot ID Q14160

Dilution Range 1:5 000 (WB)

Application Notes Additional Information: Reactivity showed on dilluted human cell culture

extracts. Background: Scribble human homologue, hScrib, is a substrate of ubiquitin-mediated degradation by human papillomavirus E6 and the E6AP ubiquitin-protein ligase. hScrib is localised to the basolateral regions of the epithelial cell line MDCK. The mammalian homolog of Scribble has a primary structure and subcellular localization similar to that of its fly homolog, but its function remains unknown. hScrib can have a potential role in the suppression of mammalian tumorigenesis. Alternative name: Protein LAP4 Reconstitution: For

reconstitution add 100 µl of sterile water
