Product Datasheet

Goat anti-Chicken IgY (H&L), ALP conjugated - trial GRP12239

Species/Host Goat

Reactivity Chicken

Predicted Reactivity Chicken IgY Heavy and Light chains (H&L)

Tested Applications ELISA, WB, IHC

Immunogen purified chicken IgY, whole molecule

Form/Appearance Liquid

Storage Non-diluted antibody is stable for 4 years at 2-8°C. For storage at

-20°C dilute antibody solution with an equal volume of glycerol to obtain final glycerol concentration of 50 % to prevent loss of enzymatic activity. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard. Be sure to

mix well but without foaming.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified goat IgG

Dilution Range 1:10 000 -1:100 000 (ELISA), 1:500 -1:2000 (IHC), 1:10

000-100 000 (WB)

Application Notes Additional Information: No reactivity is observed to non-immunoglobulin hen

serum proteins based in immunoelectrophoresischicken IgY is also called chicken or hen IgG Antibody concentration is 1.14 mg/ml and it has been afinity purified on solid phase hen IgY (H&L)Antibody is affinity purified using solid phase Chicken IgG/Y.AP conjugate is supplied in 30 mM Triethanolamine, pH 7.2, 5 mM magnesium chloride, 0.1 mM zinc chloride, 1 % (w/v) BSA, Protease/IgG free. 0.05 % (w/v) of sodium azide is added as preservative Background: Goat

anti-chicken lgY is a secondary antibody conjugated to AP (Alkaline

phosphatase) which binds to hen IgY immunoglobulin in immunological assays.
