

Product Datasheet

Goat anti-Rat IgG (H&L), Affinity purified, Unconjugated, min. cross-reactivity to human, mouse IgG GRP12282

Species/Host	Goat
Form/Appearance	Liquid
Storage	Store at 2-8°C.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified chicken IgY
Dilution Range	The optimal working dilution should be determined by the investigator.

Application Notes Additional Information: This antibody reacts with the heavy chains on rat IgG and with the light chains on all rat immunoglobulins based on immunoelectrophoresis. Highly cross absorbed against mouse IgG. Minimum cross-reactivity is observed to non- immunoglobulin rat serum proteins based on immunoelectrophoresis. Minimum cross-reactivity is observed to human or mouse IgG based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7 and 0.05 % (w/v) sodium azide as preservative. Background: Goat anti-rat IgG (H&L), affinity purified, is unconjugated secondary antibody which binds to all rat IgGs in immunological assays. Antibody is adsorbed against human, mouse IgG and affinity purified using solid phase rat IgG.
