

Product Datasheet

Chicken anti-Rat IgG (H&L), Affinity purified, Unconjugated, min. cross-reactivity to human, rabbit, IgG/serum GRP12287

Species/Host	Chicken
Form/Appearance	Liquid
Storage	Store at 2-8°C.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgY
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on rat IgG and with the light chains on all rat immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin rat serum proteins and human, rabbit, IgG/serum based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7 and 0.05 % (w/v) sodium azide as preservative.</p> <p>Background: Chicken anti-rat IgG (H&L), affinity purified, is an unconjugated secondary antibody which binds to rat IgGs in immunological assays. Antibody is adsorbed against to human, rabbit, IgG/serum and affinity purified using solid phase rat IgG.</p>
