Product Datasheet

Chicken anti-Goat IgG (H&L), Affinity purified, Unconjugated, min. cross-reactivity to human, mouse, rabbit IgG/serum GRP12291

Species/Host Chicken

Form/Appearance Liquid

Storage Store at 2-8°C.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified IgY

Dilution Range The optimal working dilution should be determined by the

investigator.

Application Notes Additional Information: This antibody reacts with the heavy chains on goat IgG

and with the light chains on all goat immunoglobulins based on

immunoelectrophoresis. Minimum cross-reactivity is observed to

non-immunoglobulin goat serum proteins based on

immunoelectrophoresis.Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7 and 0.05 % (w/v) sodium azide as preservative. BSA and milk have to be replaced by other blocking reagents, like doneky serum or commercial formulations which are free from bovine IgG. Background: Chicken anti-goat IgG (H&L) is an affinity purified secondary antibody which binds to all

goat IgGs in immunological assays. Antibody is adsorbed to to

human, mouse, rabbit IgG/serum and affinity purified using solid phase goat IgG.
