

Product Datasheet

Chicken anti-Goat IgG (H&L), Affinity purified, Unconjugated, min. cross-reactivity to human, mouse, rabbit IgG/serum GRP12291

Species/Host	Chicken
Form/Appearance	Liquid
Storage	Store at 2-8°C.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgY
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on goat IgG and with the light chains on all goat immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin goat serum proteins based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7 and 0.05 % (w/v) sodium azide as preservative. BSA and milk have to be replaced by other blocking reagents, like donkey serum or commercial formulations which are free from bovine IgG. Background: Chicken anti-goat IgG (H&L) is an affinity purified secondary antibody which binds to all goat IgGs in immunological assays. Antibody is adsorbed to human, mouse, rabbit IgG/serum and affinity purified using solid phase goat IgG.</p>
