

Product Datasheet

Goat anti-Rabbit IgG (H&L), Biotin conjugated, min. cross-reactivity to bovine,goat,human, mouse,rat IgG GRP12304

Species/Host	Goat
Form/Appearance	Liquid
Storage	Store at 2-8°C. Shelf life of this product is one year from date of receipt.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on rabbit IgG and with the light chains on all rabbit immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin rabbit serum proteins based on immunoelectrophoresis. Minimum cross-reactivity is observed to IgG from bovine, goat, human, mouse or rat based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.1 % (v/v) Kathon CG is used as preservative. Use of sodium azide will inhibit enzymatic activity of horseradish peroxidase. Background: Goat anti-rabbit IgG (H&L) is a biotin conjugated secondary antibody which binds to all rabbit IgGs in immunological assays. Antibody is adsorbed against bovine,goat,human,mouse,rat IgG and affinity purified using solid phase rabbit IgG.</p>
