Product Datasheet

Goat anti-Rabbit IgG (H&L), Biotin conjugated, min. cross-reactivity to bovine, goat, human, mouse, rat IgG **GRP12304**

Species/Host Goat

Form/Appearance Liquid

Storage Store at 2-8°C. Shelf life of this product is one year from date of

receipt.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified IgG

Dilution Range The optimal working dilution should be determined by the

investigator.

Application Notes Additional Information: This antibody reacts with the heavy chains on rabbit IgG

> and with the light chains on all rabbit immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to

non-immunoglobulin rabbit serum proteins based on immunoelectrophoresis. Minimum cross-reactivity is observed to IgG from bovine, goat, human, mouse or rat based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.1 % (v/v) Kathon CG is used as preservative. Use of sodium azide will

inhibit enzymatic activity of horseradish peroxidase. Background: Goat anti-rabbit IgG (H&L) is a biotin conjugated secondary antibody which binds to

all rabbit IgGs in immunological assays. Antibody is adsorbed against

bovine, goat, human, mouse, rat IgG and affinity purified using solid phase rabbit
