

## Product Datasheet

### Rabbit anti-Goat IgG (H&L), Affinity purified, Unconjugated, min. cross-reactivity human, mouse, Rat IgG GRP12308

Species/Host	Rabbit
Form/Appearance	Liquid
Storage	Store at 2-8°C.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on goat IgG and with the light chains on all goat immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin goat serum proteins or IgG from human, mouse or rat based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 0.05 % (w/v) sodium azide as preservative. BSA and milk have to be replaced by other blocking reagents, like donkey serum or commercial formulations which are free from bovine IgG. Expiration date: November 6, 2017 Background: Rabbit anti-goat IgG (H&amp;L), affinity purified, is an unconjugated secondary antibody which binds to all goat IgGs in immunological assays. Antibody is adsorbed against human, mouse, rat IgG and affinity purified using solid phase goat IgG.</p>
