## **Product Datasheet**

## Donkey anti-Sheep IgG (H&L), TRITC conjugated GRP12339

Species/Host Donkey

Form/Appearance Lyophilized

Storage Store lyophilized material at 2-8°C. Shelf life of this product is one

year from date of receipt.

**Note** For research use only.

**Clonality** Polyclonal

Purity Affinity purified IgG

**Dilution Range** The optimal working dilution should be determined by the

investigator.

Application Notes Additional Information: This antibody reacts with the heavy chains on sheep IgG

and with the light chains on all sheep immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to

non-immunoglobulin sheep serum proteins based on

immunoelectrophoresis.Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.1 % (v/v) Kathon CG is used as preservative.BSA and milk have to be replaced by other blocking reagents, like doneky serum or commercial formulations which are free from bovine IgG. Background: Donkey anti-sheep IgG (H&L), Rhodamine (TRITC-tetramethylrhodamine-5-isothiocyanate) conjugated is a secondary antibody which binds to sheep IgGs in immunological assays. TRITC has Amax = 550 nm, Emax = 570 nm. Antibodies are affinity purified using solid phase sheep IgG. Reconstitution: For reconstitution add 1.1 ml of sterile water. Let it stand 30

minutes at room temperature to dissolve. Centrifuge to remove any particulates.

Prepare fresh working dilutions daily.
