Product Datasheet

Chicken anti-Goat IgG (H&L), Affinity purified, Unconjugated GRP12366

Species/Host Chicken

Form/Appearance Liquid

Storage Store at 2-8°C.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified IgY

Dilution Range The optimal working dilution should be determined by the

investigator.

Application Notes Additional Information: This antibody reacts with the heavy chains on goat IgG

and with the light chains on all goat immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to

non-immunoglobulin goat serum proteins. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7, 0.05 % (w/v) sodium azide as preservative. BSA and milk have to be replaced by other blocking reagents, like dangly serum or commercial formulations which are free from boying IgG.

doneky serum or commercial formulations which are free from bovine IgG. Background: Chicken anti-goat IgG (H&L), affinity purified is a secondary antibody which binds to goat IgGs in immunological assays. Antibodies are

affinity purified using solid phase goat IgG.
