Product Datasheet

Donkey anti-Sheep IgG (H&L), TRITC conjugated, min. cross-reactivity to human, mouse, rabbit IgG GRP12367

Species/Host Donkey

Form/Appearance Liquid

Storage Store at 2-8°C. Shelf life of this product is one year from date of

receipt.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified IgG

Dilution Range The optimal working dilution should be determined by the

investigator.

Application Notes Additional Information: This antibody reacts with the heavy chains on sheep IgG

and with the light chains on all sheep immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to

non-immunoglobulin sheep serum proteins and human,mouse,rabbit lgG based on immunoelectrophoresis.Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7, ,1% (w/v) BSA, Protease/lgG free, 0.05 % (w/v) sodium azide as preservative.BSA and milk have to be replaced by other

sodium azide as preservative.BSA and milk have to be replaced by other blocking reagents, like doneky serum or commercial formulations which are free from bovine IgG. Background: Donkey anti-sheep IgG (H&L), Rhodamine (TRITC-tetramethyl rhodamine-5-isothiocyanate) conjugated, is a secondary antibody which binds to sheep IgGs in immunological assays. TRITC has Amax =

550 nm, Emax = 570 nm. Antibodies are adsorbed against and

human, mouse, rabbit IgG and affinity purified using solid phase sheep IgG.
