

Product Datasheet

Rabbit anti-Goat IgG Fc, Biotin conjugated, min. cross-reactivity to human serum GRP12376

Species/Host	Rabbit
Form/Appearance	Liquid
Storage	Store at 2-8°C. Shelf life of this product is one year from date of receipt.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on goat IgG based on immunoelectrophoresis. Minimum cross-reactivity is observed with the light chains on goat immunoglobulins or to non-immunoglobulin goat serum proteins based on immunoelectrophoresis. Minimum cross-reactivity is observed with human serum proteins based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.1 % (v/v) Kathon CG is used as preservative. BSA and milk have to be replaced by other blocking reagents, like donkey serum or commercial formulations which are free from bovine IgG.</p> <p>Background: Rabbit anti-goat IgG Fc, biotin conjugated, is a secondary antibody which binds to goat IgG Fc part in immunological assays. Antibody is adsorbed against human serum and affinity purified using solid phase goat IgG.</p>
