

Product Datasheet

Goat anti-Rabbit IgG (H&L), F(ab)'2 fragment, Biotin conjugated, min. cross-reactivity to bovine,human, mouse IgG/serum GRP12386

Species/Host	Goat
Form/Appearance	Liquid
Storage	Store at 2-8°C. Shelf life of this product is one year from date of receipt.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG, F(ab)'2 fragment
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on rabbit IgG and with the light chains on all rabbit immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin rabbit serum proteins based on immunoelectrophoresis. Minimum cross-reactivity was observed with bovine, human and mouse serum or human and mouse IgG based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.1 % (v/v) Kathon CG is used as preservative.</p> <p>Background: Goat anti-rabbit IgG (H&L), biotin conjugated, is a F(ab)'2 fragment of a secondary antibody which binds to all rabbit IgGs in immunological assays. Antibodies are adsorbed against bovine,human,mouse IgG/serum and affinity purified. Antibody purity is >90% based on SDS-PAGE. Antibody solution may contain small amounts of intact IgG.</p>
