

## Product Datasheet

### Goat anti-mouse IgM ( $\mu$ chain), Affinity purified, Unconjugated GRP12393

Species/Host	Goat
Form/Appearance	Colorless liquid, 0.2 $\mu$ m filtered
Storage	Store at 2-8°C.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	The optimal working dilution should be determined by the investigator. Antibody is suitable for: ELISA, ICC, IHC, WB
Application Notes	<p>Additional Information: This antibody reacts with the mu chain on mouse IgM based on immunoelectrophoresis. Minimum cross-reactivity is observed with the light chains based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin mouse serum proteins based on immunoelectrophoresis and has limited reaction with purified mouse IgG based on ELISA. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 0.05 % (w/v) sodium azide as preservative. The purity &gt; 95 % based on SD-PAGE. Background: Goat anti-mouse IgM, (<math>\mu</math> chain) affinity purified is a secondary antibody which binds to mouse IgM in immunological assay. Antibodies are affinity purified using solid phase mouse IgM.</p>
