

Product Datasheet

Goat anti-Mouse IgG (H&L), F(ab)'2 fragment, Affinity purified, Unconjugated GRP12394

Species/Host	Goat
Form/Appearance	Liquid
Storage	Store at 2-8°C.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG, F(ab)'2 fragment
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on mouse IgG and with the light chains on all mouse immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin mouse serum proteins based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7, 0.05 % (w/v) sodium azide as preservative.</p> <p>Background: Goat anti-mouse IgG (H&L), is a F(ab)'2 fragment, of affinity purified secondary antibody which binds to mouse IgGs in immunological assays. Antibody purity is > 90% based on SDS-PAGE. Antibody solution may contain small amounts of intact IgG.</p>
