Product Datasheet

Donkey anti-Rat IgG (H&L), TRITC conjugated, min. cross-reactivity to bovine, chicken, goat, guinea pig, hamster, horse, human, mouse, rabbit, sheep IgG GRP12403

Species/Host Donkey

Form/Appearance Liquid

Storage Store at 2-8°C. Shelf life of this product is one year from date of

receipt.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified IgG

Dilution Range The optimal working dilution should be determined by the

investigator.

Application Notes Additional Information: This antibody reacts with the heavy chains on rat IgG and

with the light chains on all rat immunoglobulins based on

immunoelectrophoresis. Minimum cross-reactivity is observed to

non-immunoglobulin rat serum proteins or IgG from bovine, chicken, goat, guinea pig, hamster, horse, human, mouse, rabbit, or sheep based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7, 1% (w/v) BSA, Protease/IgG free and 0.05 % (w/v)

sodium azide as preservative. Background: Donkey anti-rat IgG (H&L),

Rhodamine (TRITC - tetramethylrhodamine-5-isothiocyanate) conjugated, is a secondary antibody which binds all rat IgGs in immunological assays. TRITC has

Amax = 550 nm, Emax = 570 nm. Antibody is adsorbed to

bovine, chicken, goat, guinea pig, hamster, horse, human, mouse, rabbit, sheep IgG

and affinity purified using solid phase rat IgG.
