## **Product Datasheet**

## Chicken anti-Goat IgG (H&L), Biotin conjugated **GRP12405**

Species/Host Chicken

Form/Appearance Liquid

Storage Store at 2-8°C. Shelf life of this product is one year from date of

receipt.

Note For research use only.

Clonality Polyclonal

**Purity** Affinity purified IgY

The optimal working dilution should be determined by the **Dilution Range** 

investigator.

**Application Notes** Additional Information: This antibody reacts with the heavy chains on goat IgG

and with the light chains on all goat immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to

non-immunoglobulin goat serum proteins based on

immunoelectrophoresis.Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.05 % (w/v)

sodium azide as preservative.BSA and milk have to be replaced by other

blocking reagents, like doneky serum or commercial formulations which are free from bovine IgG. Background: Chicken anti-goat IgG (H&L), biotin conjugated is a secondary antibody which binds to goat IgGs in immunological assays.

Antibodies are affinity purified using solid phase goat IgG.
