

Product Datasheet

Goat anti-Mouse IgG (H&L), Affinity purified, Unconjugated, min. cross-reactivity to human IgG/serum

GRP12412

Species/Host	Goat
Form/Appearance	Liquid
Storage	Store at 2-8°C.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on mouse IgG and with the light chains on all mouse immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin mouse serum proteins based on immunoelectrophoresis. Minimum cross-reactivity is observed with human IgG or serum proteins based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7, 0.05 % (w/v) sodium azide as preservative. Background: Goat anti-mouse IgG (H&L), affinity purified, is a secondary antibody which binds to mouse IgGs in immunological assays. Antibodies are adsorbed against human IgG/serum and affinity purified using solid phase mouse IgG.</p>
