

Product Datasheet

Goat anti-Human IgM (μ chain), F(ab)'2 fragment, Biotin conjugated GRP12418

Species/Host	Goat
Form/Appearance	Liquid
Storage	Store at 2-8°C. Shelf life of this product is one year from date of receipt.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG, F(ab)'2 fragment
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	Additional Information: This antibody reacts with the mu chains on human IgM based on immunoelectrophoresis. Minimum cross-reactivity is observed with IgG, F(ab)'2 fragment based on immunoelectrophoresis. No reactivity is observed to non-immunoglobulin human serum proteins based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.1 % (v/v) Kathon CG is used as preservative. Background: Goat anti-human IgM (μ chain), F(ab)'2 fragment, biotin conjugated is a secondary antibody which binds to human IgM in immunological assays. Antibody purity is > 90% based on SDS-PAGE. Antibody solution may contain small amounts of intact IgG.
