

## Product Datasheet

### Goat anti-Human IgM ( $\mu$ chain), Biotin conjugated, min. cross-reactivity to human IgA or IgG GRP12450

|                   |  |
|-------------------|--|
| Species/Host      | Goat   |
| Form/Appearance   | Liquid   |
| Storage           | Store at 2-8°C. Shelf life of this product is one year from date of receipt.   |
| Note              | For research use only.   |
| Clonality         | Polyclonal   |
| Purity            | Affinity purified IgG  |
| Dilution Range    | The optimal working dilution should be determined by the investigator.   |
| Application Notes | <p>Additional Information: This antibody reacts with: heavy (<math>\mu</math>) chains on human IgM based on immunoelectrophoresis. Minimum cross-reactivity is observed to: non-immunoglobulin human serum proteins IgG, F(ab)'2 fragment human IgA or IgG. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.05 % (w/v) sodium azide as preservative. Background: Goat anti-human IgM (<math>\mu</math> chain), biotin conjugated, is a secondary antibody which binds to human IgM in immunological assays. Antibodies are adsorbed against human IgA or IgG and affinity purified using solid phase human IgM.</p> |
