

Product Datasheet

Goat anti-Human IgM (μ chain), Biotin conjugated, min. cross-reactivity to human IgA or IgG GRP12450

Species/Host	Goat
Form/Appearance	Liquid
Storage	Store at 2-8°C. Shelf life of this product is one year from date of receipt.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	Additional Information: This antibody reacts with: heavy (μ) chains on human IgM based on immunoelectrophoresis. Minimum cross-reactivity is observed to: non-immunoglobulin human serum proteins IgG, F(ab)'2 fragment human IgA or IgG. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.05 % (w/v) sodium azide as preservative. Background: Goat anti-human IgM (μ chain), biotin conjugated, is a secondary antibody which binds to human IgM in immunological assays. Antibodies are adsorbed against human IgA or IgG and affinity purified using solid phase human IgM.
