Product Datasheet

Goat anti-Human IgA + IgG + IgM, F(ab)'2 fragment, Biotin conjugated GRP12454

Species/Host Goat

Form/Appearance Liquid

Storage Store at 2-8°C.Shelf life of this product is one year from date of

receipt.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified IgG, F(ab)'2 fragment

Dilution Range The optimal working dilution should be determined by the

investigator.

Application Notes Additional Information: This antibody reacts with the heavy chains on human IgA

+ IgG + IgM and with the light chains on all human immunoglobulins based on

immunoelectrophoresis. Minimum cross-reactivity is observed to

non-immunoglobulin human serum proteins based on

immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and and 0.05 % (w/v) sodium azide as preservative. Background: Goat anti-human IgA + IgG + IgM, biotin conjugated is a F(ab)'2 fragment of a secondary antibody which binds to human IgA and IgG and IgM. Antibody purity is > 90% based on SDS-PAGE.

Antibody solution may contain small amounts of intact IgG.
