

Product Datasheet

Goat anti-Guinea pig IgG (H&L), Biotin conjugated, min. cross-reactivity to bovine, chicken, goat, hamster, horse, human, mouse, rabbit, rat, Sheep serum GRP12467

Species/Host	Goat
Form/Appearance	Liquid
Storage	Store at 2-8°C. Shelf life of this product is one year from date of receipt.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on guinea pig IgG and with the light chains on all guinea pig immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin guinea pig serum proteins and bovine, chicken, goat, hamster, horse, human, mouse, rabbit, rat, sheep serum based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.05 % (w/v) sodium azide as preservative. Background: Goat anti-guinea pig IgG (H&L), biotin conjugated, is a secondary antibody which binds to guinea pig IgGs in immunological assays. Antibodies are adsorbed against bovine, chicken, goat, hamster, horse, human, mouse, rabbit, rat, sheep serum and affinity purified using solid phase guinea pig IgG.</p>
